2019 Annual Assessment Report
Pacific Shores Subdivision

The *Annual Assessment Report* (Report) was prepared by the Del Norte County Community Development Department to comply with Special Condition Number 4 of Coastal Development Permit Number 1-17-0631 issued by the California Coastal Commission on January 3, 2018 and amend amended through an immaterial amendment on February 9, 2018.

Code Enforcement Officer Dominic Mello conducted a site visit to the Pacific Shores Subdivision on September 6th, 2019. No new illegal dumping was located during the site visit. All the roads traversed during the 2018 Baseline Report were inspected during the 2019 site visit. The following Report complies with protocol outlined in the *Del Norte County Monitoring Plan* dated December 18, 2017. The Report is divided into three parts with an Appendix.

Part 1 is a status update of the remaining sites that were identified in the *2018 Baseline Conditions Report Pacific Shores Subdivision* (Report). Remaining sites that have been carried over from the 2018 Baseline Conditions reports are Sites, 1, 11, 22, 59, 44, 45, 53, 54, 55, 56, 57 and 58. The remaining sites are in most cases connected to an active occupation site.

Part 2 provides updated status of the 6 new sites identified during the site visit on September 25, 2018. The photos are labeled consecutively 53 through 58 and include the same information included for the original 52 sites from the 2018 Baseline Conditions Report. Code Enforcement cleaned up the debris from these 6 sites in 2018 and they are now clean.

Part 3 is two tables which represent new illegal dump sites from the 2018 Annual Assessment Report which have been cleaned. Table 2 listed the sites that have carried over from prior years which remain occupied or still blighted.

Lastly, the Report contains an Appendix that includes recorded data provided by the Del Norte Sheriff's Office for calls for service within the Pacific Shores Subdivision since the preparation of the Plan. The California Highway Patrol had no new calls to report for the same time period.

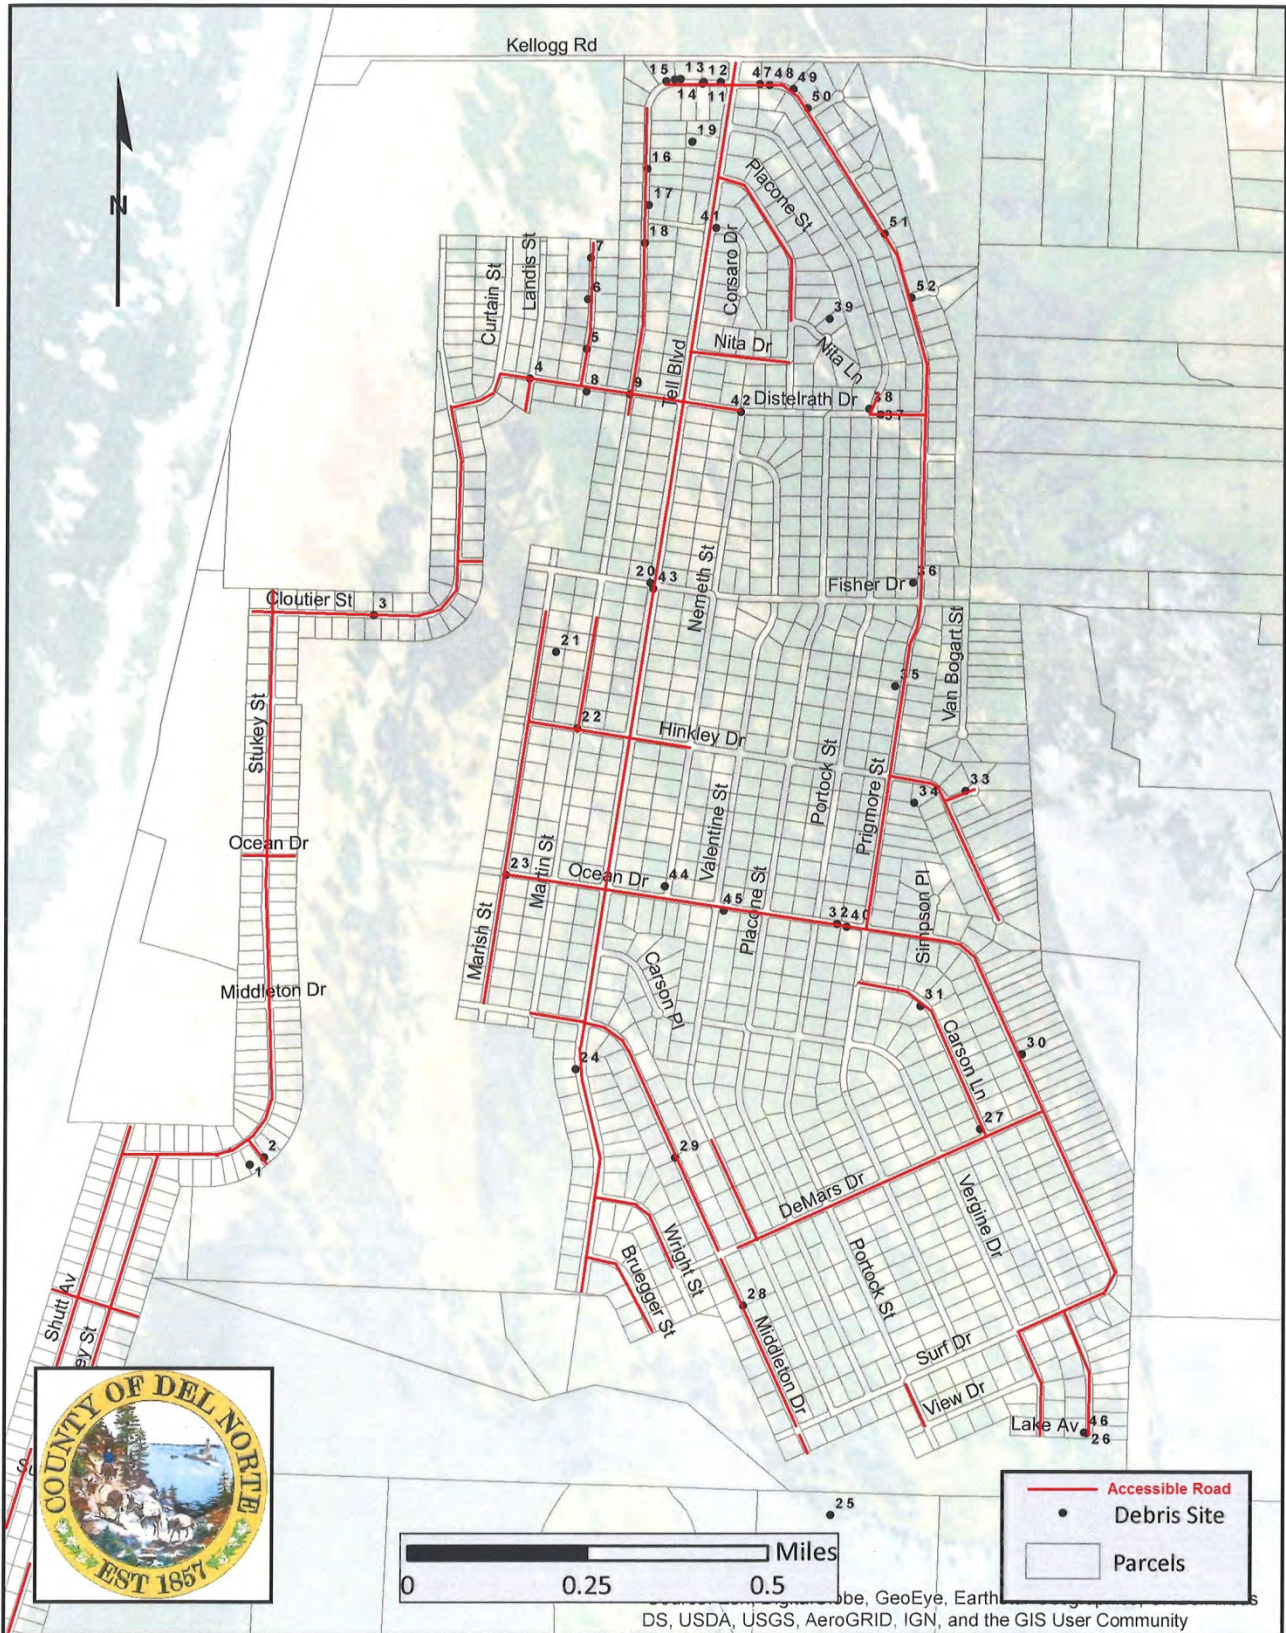

Prior to the watchman's station, dumping in the Pacific Shores Subdivision consisted mainly of the illegal dumping of household waste, electronic wastes and abandoned vehicles and RVs. Currently the new trend at Pacific Shores Subdivision is unlawful lodging or camping within the right of ways. Around 8 travel trailers or recreational vehicles were observed parked at the ends of various roads or turnout locations at Pacific Shores Subdivision. All 8 of the observed travel trailers or recreational vehicles were located west of Tell Blvd. It is unknown how long each of these illegal lodgers has been on site. Two observations stood out, first the recreational vehicles or trailers ranged from newer models to obvious aged and dilapidated units. Indicating the newer models are people with means that are taking advantage of free camping while the more aged dilapidated units are most likely occupied by subjects without a residential home. Second I did not observe the normal accumulation of garbage around the perimeter of the 8 occupiers observed. With the *Martin v. City of Boise (9th Cir. 2019)* decision the enforcement of local camping ordinances has been difficult at best. Currently addressing the illegal occupancy of public right of ways remains without a solution.
